

INTRODUCING AN AMAZING THERAPY MACHINE

THAT MOVES ALL
IN MULTI DIRECTIONS

LIMBS

STROKE RECOVERY

Ron Dillon suffered a stroke 10 years previously and was told he would not walk, drive or work again. With the help of the Quadriciser he is now doing all of those

RYAN'S HOPE: MIRACULOUS STORY

Legendary singer Pat Boone's grandson, Ryan, survived falling 40 feet through a skylight and sustained multiple injuries including traumatic brain injury.

HIGH HOPES HEAD INJURY PROGRAM

High Hopes treats adults with Traumatic Brain Injury. The facility uses the Quadriciser to increase range of motion and to simulate walking and crawling patterns.

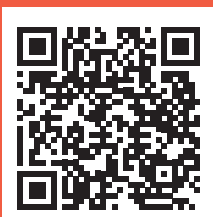

We have 97% success rate in getting people out of the wheelchairs and walking again. We just ordered our 15th Quadriciser

*Mark Desmond
Director of High Hopes Head Injury Program*

STROKE CLUB IS AMAZED!

Members of the Stroke Club in Knoxville, TN were amazed what a few minutes on the Quadriciser Robotic Rehabilitation Therapy System (QR2TS) can do. One member could never open his hand or walk without his cane, until now.

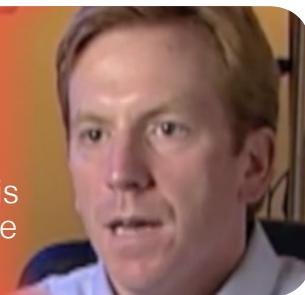

SCHOOL THERAPISTS LOVE IT!

The Quadriciser is improving the lives of students with Cerebral Palsy, Traumatic Brain Injury and other conditions that keep them from being attentive and active. Listen to what Dr. Thomas E. Moran has to say about Quadriciser.

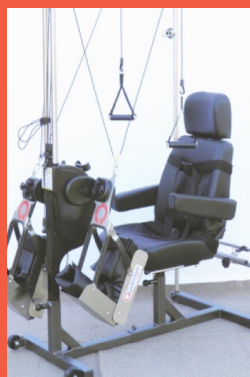

PHYSICAL THERAPIST'S VIEW

Physical therapist John Staley talks about the many attributes of the QR2TS in a clinical environment. "It is a wonderful tool in the hands of a Skilled Therapist. In a home it provides 24/7/365 access to therapy for the user."

The Quadriciser Robotic Rehabilitation Therapy System (QR2TS) is designed to move the arms and legs simultaneously in patterns that closely simulates walking and crawling. These motions are very natural to the body. Individuals who find it difficult or impossible to move on their own often report great benefits after using the Quadriciser.
