Capability Statement

Quadriciser Corporation is a small business that manufactures the Quadriciser Robotic Rehabilitation Therapy System (QR²TS). The QR²TS helps individuals with minimum to severe disabilities receive rehabilitative therapy that aids in regaining mobility in all four limbs through neuromuscular reeducation.

Capabilities

- Reduced Pain
- Muscular Reeducation
- Released Contractures
- Faster Healing Process
- Increased Range of Motion
- Increased Vitality and Alertness
- Improved Purposeful Movement
- Improved Bowel and Bladder Function
- Improved Gait & Balance to Reduce Falls
- Increased Circulation and Oxygen to the Brain
- Stroke
- Diabetes
- Spina Bifida
- Fibromyalgia
- Parkinson's Disease (PD)
- Spinal Cord Injury (SCI)
- Muscular Dystrophy (MD)
- Traumatic Brain Injury (TBI)
- Amyotrophic Lateral Sclerosis (ALS)
- Reflex Sympathetic Dystrophy (RSD)
- Cerebral Palsy (CP)
- Peripheral Neuropathy
- Multiple Sclerosis (MS)

Differentiators

- The Quadriciser Robotic Rehabilitation Therapy System (QR²TS) is the only medical device that moves all four limbs simultaneously in a continuous, natural, passive motion with high repetitions to help reconnect the nerve pathways in the brain.
- The Quadriciser performs 19 rehabilitative therapies including simulated walking, crossing midline, ankle dorsiflexion, etc.
- It is humanly impossible to replicate the consistent and constant motion provided by the Quadriciser and takes the physical exhaustion out of therapy.
