

ROBOTICALLY MOVES ALL 4 LIMBS IN MULTI DIRECTIONS

Quadriciser®
Robotic Rehabilitation Therapy System
Movement Equals Improvement

Kerry Foster
MSGT. USAF Retired
Disabled Veteran
Former Quadriciser
Employee.

The Quadriciser Robotic Rehabilitation Therapy System® (QR²TS) is a medical device that accelerates rehabilitation and speeds treatment efficiency. The body is designed to heal itself – **through movement.**

The unique motion pattern of the QR²TS helps recovery through neuroplasticity. This allows neurons in the brain to compensate for injury and disease by creating new neuron pathways.

The QR²TS greatly benefits veterans suffering from: TBI, ABI, Concussions, Stroke, Parkinson's, MS, ALS, and more. Users report that the Quadriciser improves gait, decreases pressure sores, speeds wound healing, fosters neuromuscular rehabilitation and re-education, and eases depression.

ACCELERATE RECOVERY

Get Healthy faster with Proven Results!

High Hopes Head Injury Program has 14 Quadricisers in their Center.

First Brain Injury Program in the United States

"I can do an extension for someone that is contracted, but it's very labor intensive and takes an enormous amount of time. This machine allows us to be able to adjust and work on extensions in less time"

- Mark Desmond
High Hopes Head Injury Director

U.S. Army Specialist Evan Mettie was injured outside of Mosul, from a suicide bomber. The explosion caused severe traumatic brain injury. "It has been a month now that Evan has had the Quadriciser and what a wonderful month it has been. We have seen so many "small" changes in Evan and for a severe TBI injury this is HUGE!"

- Denise Mettie
Evan's Mother

"The Quadriciser fills a needed and valuable gap in the system as far as therapy for spinal cord injuries, neurological damages from strokes or other debilitating illnesses. It is an excellent tool in the hands of a physical therapist."

- John D. Staley, III, PT, CSCS
Champion Physical Therapy President

"This is worth my whole day. I haven't been able to open my hand in over 15 years. I can open it by myself!"

- Mr. Brooks
Ability Convention Visitor

Now is the time to install the QR²TS in
your home or in a facility near you.
