

Repetitive Movement EQUALS IMPROVEMENT

— GENTLY —
**MOVES ALL
4 LIMBS**
MULTI DIRECTIONS

Repetition vastly improves recovery time. That's why the Quadriciser Robotic Rehabilitation Therapy System (QR2TS) is a powerful yet gentle medical device that helps individuals with moderate to severe disabilities.

The QR2TS increases range of motion without pain. Its extreme versatility allows the arms to be manipulated in almost any direction, including crossing midline, while moving the legs in a crawling or walking pattern.

**Easily
installed
for Home or
Professional
setting**
