

ACCELERATE RECOVERY

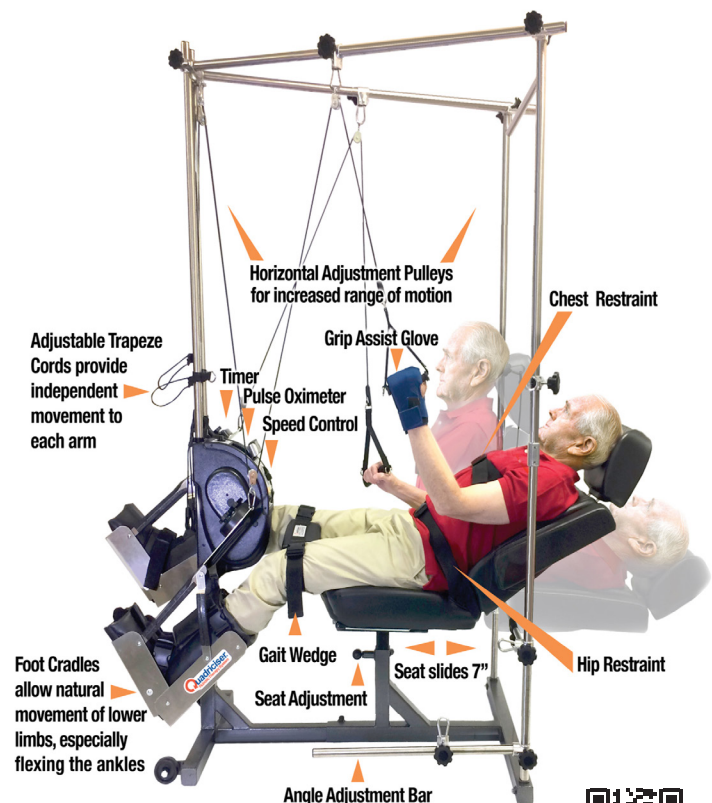

Quadriciser®
Robotic Rehabilitation Therapy System
Movement Equals Improvement

Benefits Patients With:

- Dementia
- Parkinson's
- ALS
- Alzheimer's
- Paralysis
- TBI

& many other types of debilitating issues to help continue natural movement for the whole body. This is vital to maintain adequate circulation and promotes natural healing.

Recline to Simulate Walking

The Quadriciser Works!

"This is worth my whole day. I haven't been able to open my hand in over 15 years. I can open it by myself!" (His first time on the Quadriciser, he was able to open his hand after only 30 minutes).

- Mr. Brooks
Special Guest user at Ability Convention

"I can do an extension for someone that is contracted but it's very labor intensive and takes an enormous amount of time. This machine allows us to be able to adjust and work on extensions in less time."

- Mark Desmond
High Hopes Brain Injury Director

"I had 2 back surgeries, had a lot of pain in my right hip and my right shoulder. When I got off the the Quadriciser I was able to walk normal. I haven't walked normal in 30 years. The Quadriciser feels good. Feels like a natural movement. Helped with my depression too."

- Mike Boyd
Quadriciser User

"The Quadriciser fills a needed and valuable gap in the system as far as therapy for spinal cord injuries, neurological damages from strokes or other debilitating illnesses. It is an excellent tool in the hands of a physical therapist."

- John D. Staley, III, PT, CSCS
Physical Therapist

Janice Walker, OTR
Clinical Director

"The Quadriciser engages the brain to get that reeducation going again. It's beautiful with Parkinson's disease. I have one person on it now that has told me, I feel like I'm walking again!"

- Janice Walker, OTR
Occupational Therapist, Registered &
InterX Therapy Center Clinical Director
