

Stroke Recovery Begins Now!

Quadriciser®
Robotic Rehabilitation Therapy System
Movement Equals Improvement

Immediate rehabilitation can improve recovery outcomes, but remarkable recoveries may occur many years later with intensive therapy.

In some cases, the brain cells may be only temporarily damaged, not killed, and may resume functioning over time. In other cases, the brain can reorganize its own functioning with proper rehabilitation. Sometimes, a region of the brain "takes over" for a region damaged by the stroke.

40% experience serious impairments requiring special care

25% recover with minor impairments

15% die shortly after the stroke

10% require care in a nursing home or long-term care facility

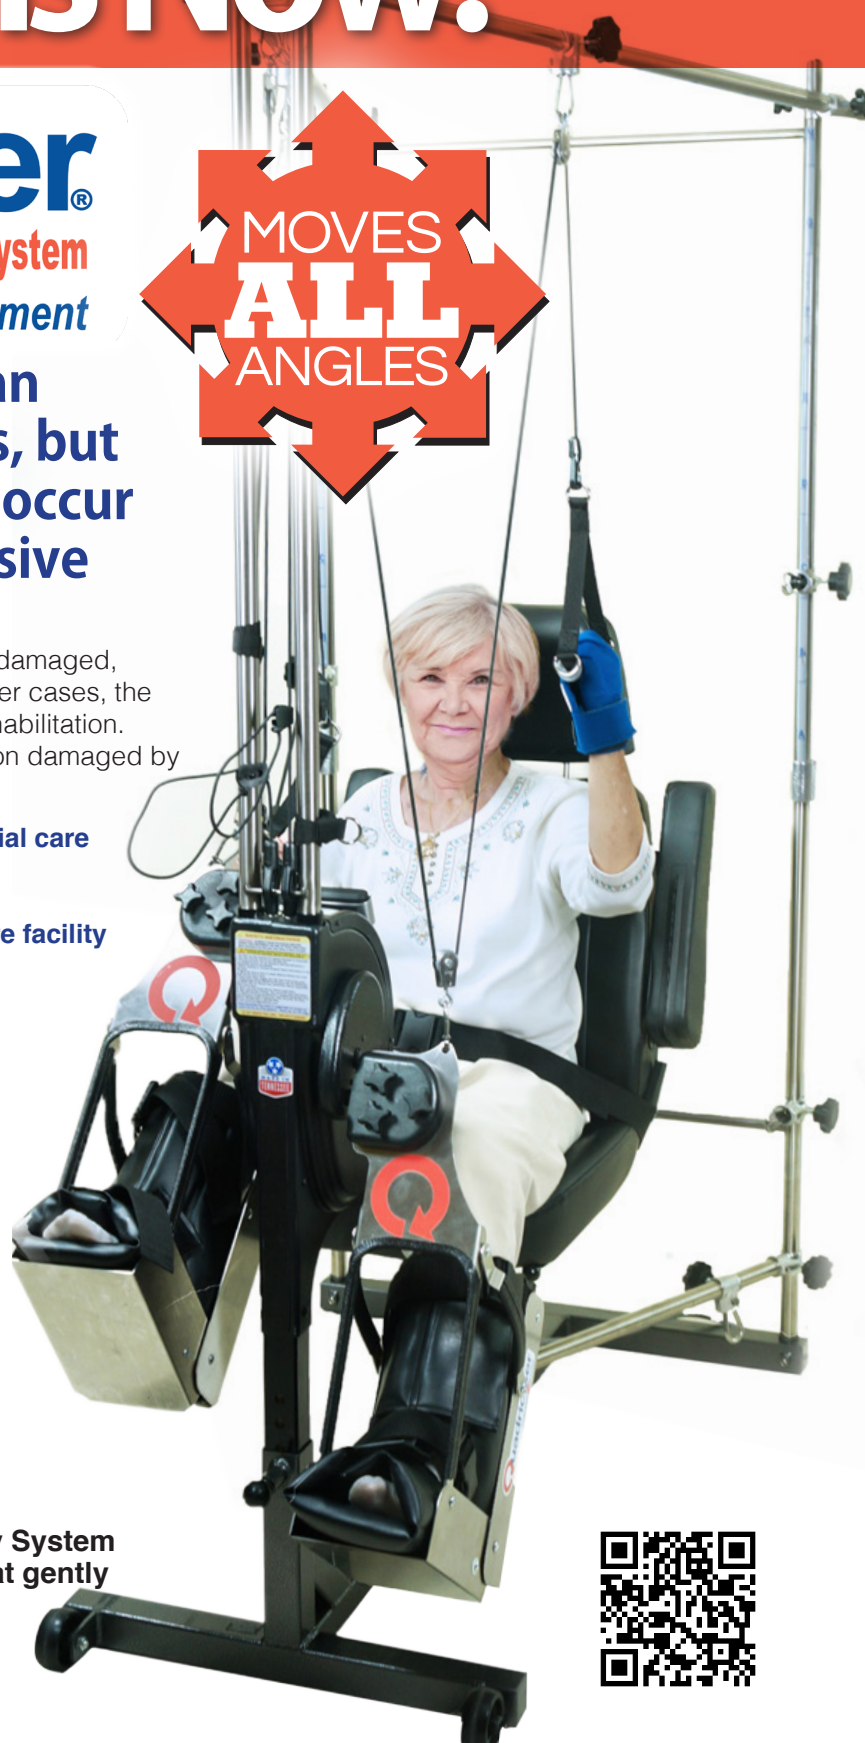

10% of stroke survivors recover almost completely

Examples of a contracture without therapy

The Quadriciser Robotic Rehabilitation Therapy System (QR2TS) is the only patented therapy device that gently moves all four limbs simultaneously in natural movement patterns. It can relieve and prevent contractures. The Quadriciser is cost effective and time saving.

The Quadriciser Works!

The Quadriciser Robotic Rehabilitation Therapy System (QR2TS) is a unique therapy device. It moves the limbs in natural movement patterns. High numbers of repetitions help reconnect nerve pathways.

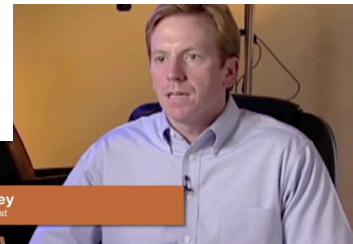

Quadriciser benefits:

- Increases Range of Motion
- Increases Dorsiflexion
- Improves Gait Function
- Simulates Walking
- Provides Gentle Movement
- Improves Heart Rate
- Improves Circulation
- Promotes Better Balance

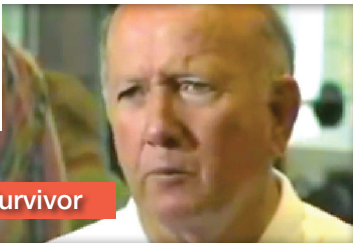

"This is worth my whole day. I haven't been able to open my hand in over 15 years." (He was able to open his hand after 1 use of the Quadriciser). "I can open it by myself!"

- Mr. Brooks
Special Guest user at Ability Convention

"The Quadriciser fills a needed and valuable gap in the system as far as therapy for spinal cord injuries, neurological damages from strokes or other debilitating illnesses. It is an excellent tool in the hands of a physical therapist."

- John D. Staley, III, PT, CSCS
Champion Physical Therapy President

"They had told me I would probably never walk again, never work again, or never drive a car again."

"But now I am walking, I am driving, and I am doing volunteer work with different organizations."

- Ron Dillion
Stroke Survivor

The Quadriciser Robotic Rehabilitation Therapy System
moves all 4 limbs and does so much MORE.
